SUMMARY

DevOps and Cloud Engineer with 4+ years of hands-on experience in cloud infrastructure, automation, and CI/CD practices. Currently working as a Cloud Support Engineer at Amazon Web Services (AWS) in the Containers domain, supporting production workloads using Amazon EKS, ECS, and Fargate. Strong expertise in Linux systems, networking, containerization, and Infrastructure as Code, with experience managing scalable cloud environments. Proven ability to troubleshoot complex issues, perform root cause analysis, and collaborate with cross-functional teams to deliver secure, reliable, and cost-efficient cloud solutions aligned with DevOps best practices.

TECHNICAL SKILLS

- **Programming** : Python, Java, Data Structures and Algorithms (Concepts), Linux (Shell/Bash scripting)
- **DevOps tools** : Docker, Kubernetes, Ansible, Terraform, Jenkins CICD, Chef, Puppet, Kafka
- **Cloud Services** : **AWS** - EKS, ECS, Fargate, *EC2, S3, IAM, ELB, CodePipeline, CloudFormation, CloudWatch*, **Azure**
- **Database** : Structured Query Language (SQL)
- **QA Tools** : Selenium, Cucumber BDD framework, Karate, TestNG, JUnit, Maven, Gradle
- **Methodologies** : Agile - Scrum, Kanban, XP (Extreme Programming), Waterfall model
- **Monitoring Tools** : Prometheus, Grafana, Kibana
- **Tools** : Nexus, JFrog Artifactory, Git, GitHub, Jira, Slack, Intellij, Eclipse, VSCode, Word, Excel, Powerpoint
- **Certifications** : AWS Certified Cloud Practitioner (Badge), AWS Certified Solutions Architect - Associate (Badge), NPTEL (Python, C, C++)

WORK EXPERIENCE

Amazon Web Services (AWS), Seattle, United States

Cloud Support Engineer - Containers (DevOps) **June 2024 - Present**

- Troubleshoot customer issues across **AWS deployments, cloud networking, and service configurations**, ensuring reliable operation of production workloads.
- Specialize in AWS container services including **Amazon EKS, ECS, and Fargate**, providing architectural and operational recommendations to optimize application scalability and performance.
- Lead resolution of **complex, high-impact production issues** involving Amazon EKS, ensuring reliability and scalability of containerized workloads and troubleshooting across **Docker, Kubernetes, Amazon ECR, AWS App Mesh, and batch processing systems**.
- Exceeded performance targets by resolving **850+ customer cases** (206% of goal) while consistently maintaining **95% CSAT**.
- Leverage **AWS CloudFormation** to automate infrastructure provisioning, reducing deployment time and configuration errors by **30%**.
- Advise customers on **fault-tolerant, scalable cloud architectures** supporting enterprise workloads and legacy modernization initiatives.
- Collaborate cross-functionally with **service teams, operations, and customers** to deliver detailed **root cause analysis (RCA)** and long-term architectural improvements.
- Design and review **custom IAM policies** based on customer requirements, strengthening security through **least-privilege access** while promoting best practices in security, performance, and cost optimization.

Texas Tech University, Texas, United States

Graduate Assistant - Operations Division **August 2022 - May 2024**

- Actively participated in supporting the management of Transportation and Parking Services by applying technical expertise.
- Collaborated with the team to leverage **Python** for scripting and tool development, effectively addressing departmental needs.
- Leveraged **Postman** tool to test APIs, consistently resolving a high percentage of encountered issues for the department web application.

Informatica Business Solutions Pvt Ltd., Bangalore, India

Software Engineer **April 2021 – July 2022**

- Collaborated with cross-functional teams to implement a **CI/CD** pipeline using Jenkins, **Git**, and AWS CloudFormation, facilitating testing, integration, and continuous deployment, reducing manual errors by over 80%.
- Worked on **Ansible** playbooks to launch **EC2** instances on AWS using YAML scripting.

- Automated testing in Informatica Intelligent Cloud Services (IICS) using **Selenium**, resulting in a substantial reduction in testing and deployment time.
- Utilized **Prometheus** & **Kibana** for application performance monitoring, reducing incident response time by 40%.
- Managed critical AWS services, including EC2 instances and **Data Pipelines**, for four microservices.
- Possess in-depth knowledge in **Azure** cloud infrastructure and services, covering Virtual Machines, Storage, Networking, and Security.

Associate Software Engineer **January 2020 – March 2021**

- Assisted in the implementation of Infrastructure as Code (IaC) using **Terraform** to provision and manage the AWS resources, reducing deployment time by 50%.
- Supported **Agile/Scrum** methodologies, participating in daily stand-ups, sprint planning, and retrospectives, fostering effective communication and iterative development within the team.
- Leveraged industry-standard tools like **Postman** and **Swagger** to comprehensively test APIs, consistently resolving a high percentage of encountered issues.
- Assisted in setting up local development environments with **Docker** and managed application deployments on **Kubernetes** clusters using **Helm** charts and kubectl commands.
- Implemented multiple conditional-based shell scripts within **Jenkins** to proactively track various activities, including process errors, and module-based application health checks, as part of the CI/CD pipeline.

PROJECTS

Netflix Clone CI/CD pipeline with Monitoring and Alerting (GitHub) **October 2023**

Deployed a Netflix clone application into a K8s cluster, emulating the original platform's features. Developed a CI/CD pipeline using Jenkins, paired with thorough code scan analysis using Sonarqube. Integrated Grafana, and Prometheus to monitor metrics.

Deployed a Containerized web application on Amazon EKS (GitHub) **December 2022**

Utilized Jenkins for seamless CI/CD, Maven for efficient builds, and Git for version control to package and deploy a web application using a Docker container image. This ensured high availability on Amazon EKS by managing replicas and automating pod recovery.

Skills Recommender (GitHub) **October 2021**

Utilized Python's Beautiful Soup module to perform web scraping of trending IT job skills from 2 websites for informed career decisions.

EDUCATION

Texas Tech University, United States Aug 2022 – May 2024

Master's in Computer Science **GPA: 3.75**

Sathyabama Institute of Science and Technology, India July 2016 - May 2020

Bachelor's in Computer Science and Engineering **CGPA: 9.26**
